[What's this?](#)

\*Jurisdictions may take 2-4 weeks to confirm a case of SARS-CoV-2 in a pregnant woman and a jurisdictional health department or 2) the earliest available date related to the illness or symptoms.

\*\*Date of diagnosis is derived from the earliest date of either 1) when the case report was received by a jurisdictional health department or 2) the earliest available date related to the illness or symptoms.

More information on this dataset: [COVID-19 Case Surveillance Public Use Data](#)

\*Deaths reported by jurisdictional health departments reflect the most up-to-date information based on preliminary reporting using the case report. Date of death is used for reporting, a date of diagnosis is used. Delays may exist in reporting of deaths from initial confirmation of infection.

\*\* In July 2021, the Delta variant of SARS-CoV-2 became the predominant variant in the United States.

# Pregnant Women with COVID-19 Who Were Hospitalized, I January 22, 2020 - December 6, 2021

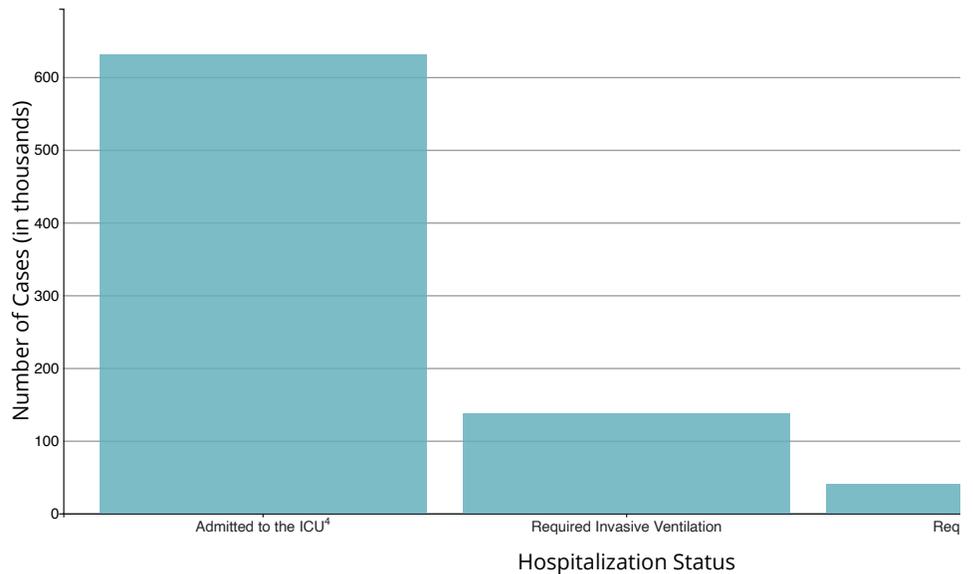

Data were collected from 150,036 women, but hospitalization data were only available for

HOSPITALIZED CASES<sup>3</sup>

## 25,402

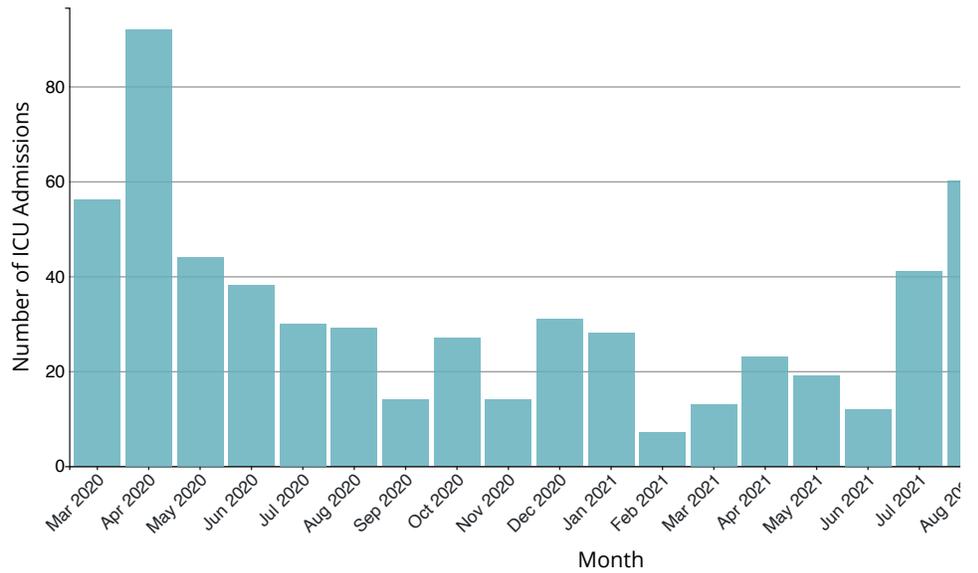

# Pregnant Women with COVID-19 Admitted to the ICU, W Invasive Ventilation, or Who Required ECMO, United State 2020 - December 6, 2021

Data were collected from 150,036 women, but ICU admission data were only available for 12,567 (8.4%) women, invasive ventilation data were only available for 12,567 (8.4%) women, and ECMO data were only available for 12,985 (8.7%).

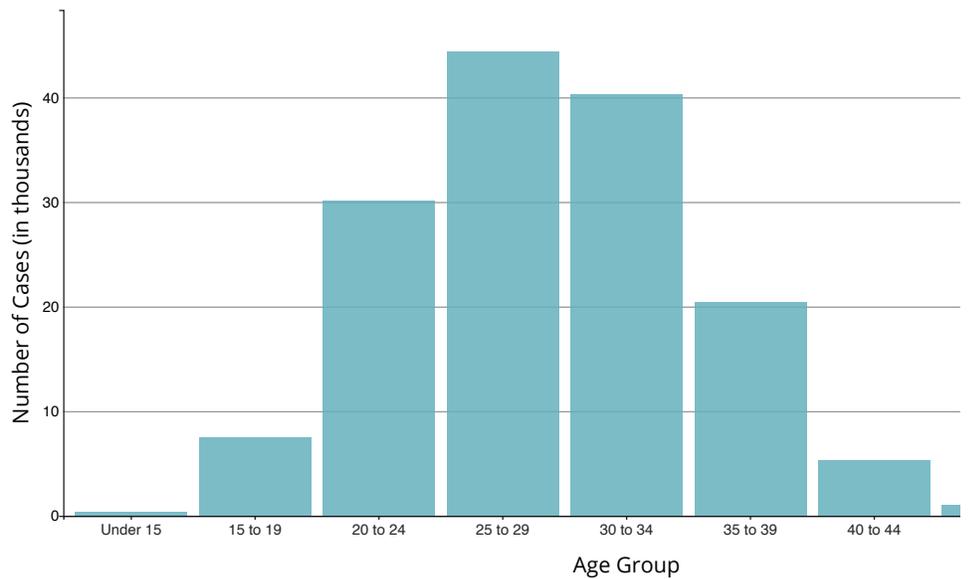

# Intensive Care Unit (ICU) Admissions among Pregnant W COVID-19 by Month

Data were collected from 150,036 women, but ICU admission data were only available for 12,567 women.

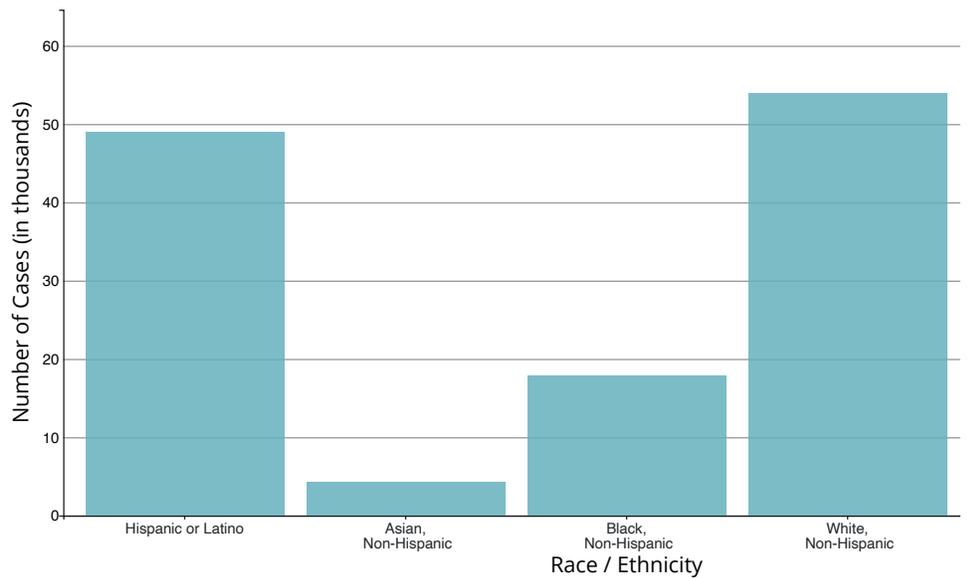

### Pregnant Women with COVID-19 by Age, United States, January 22, 2020 - December 6, 2021

Data were collected from 150,036 women, and age was available for 150,036 (100%)

### Pregnant Women with COVID-19 by Race/Ethnicity, United States, January 22, 2020 - December 6, 2021

Data were collected from 150,036 women, but race/ethnicity was only available for 131,300 (87.5%)

<sup>1</sup>Cases with age <9 years and >54 years are excluded. Cases with unknown age are included.

<sup>2</sup>Other race includes non-Hispanic American Indian or Alaska Native or non-Hispanic Native Hawaiian or Other Pacific Islander.

<sup>3</sup>Data were not available to distinguish hospitalization for COVID-19-related indications, such as worsening respiratory status, from pregnancy-related indications, such as delivery.

<sup>4</sup>Abbreviation: ICU, intensive care unit; ECMO, extracorporeal membrane oxygenation, an advanced life support technique used for threatening heart and/or lung problems.

## Footnotes

---

This webpage is updated weekly. The cases reported include only confirmed cases with laboratory evidence of

### About the Data:

All data on this page come from the [Human Infection with 2019 Novel Coronavirus Case Report Form](#). There are affiliated jurisdictions reporting cases of COVID-19 to CDC. This includes 50 states, District of Columbia, Guam, Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands. Only about a third of case report forms include pregnancy status. Therefore, these numbers likely do not include all pregnant women with COVID-19 in the U.S. and should be interpreted with caution. The completeness of the pregnancy variable continues to improve each week. Increases in the number of cases of COVID-19 among pregnant women are largely due to the updating of pregnancy status among already reported cases. Numbers reported on other websites may differ from what is posted on CDC's website because CDC's overall counts are validated through a confirmation process with each jurisdiction. Differences between reporting jurisdictions can occur due to the timing of reporting and website updates. The process used for finding and confirming cases may differ. Case counts may fluctuate from week to week due to data quality and cleaning processes.

Since October 2020, CDC has excluded reports of cases of COVID-19 among pregnant women who are younger than age 54 in the weekly reporting. Based on review of data quality, cases reported as pregnant with ages younger than 54 are less likely to be true pregnancies, and more likely to be data errors. Cases with unknown age are still included.

For more information on how CDC collects COVID-19 surveillance data, see [FAQ: COVID-19 Data and Surveillance](#).

For information on the multiple efforts CDC is supporting to understand the impact of COVID-19 on pregnant women, see [Investigating the Impact of COVID-19 during Pregnancy?](#)

For surveillance data on birth and infant outcomes from the Surveillance for Emerging Threats to Mothers and Newborns (NET) see [COVID-19 during Pregnancy: Birth and Infant Outcomes](#).

## Looking for data on birth and infant outcomes among pregnant women with COVID-19?

Visit CDC's Birth and Infant Outcomes data page for information on delivery type, preterm birth, and infant test results.

## Want to learn more about COVID-19 risk for pregnant women who are breastfeeding?

Find more information and resources for pregnancy, breastfeeding, and caring for newborns during the COVID-19 pandemic. Learn more about COVID-19 information on COVID-19 vaccines while pregnant or breastfeeding.
